## Maths Challenge

### Birthdays

Mum and Paul are talking about birthdays.

They take Paul's age and double it.  
Then they add 5.  
The answer is 35.  
Mum says this is her age.  
How old is Paul?

Make up more problems like this.  
Try to use some of these words:

double    halve    add    subtract

Make it harder .....

- add in more steps,
- make the vocabulary used more challenging (use square or cube numbers)
- make it so there is more than one answer - his birthday could be within a range of numbers.
